🪪 PROFILE

Hi there!

I am a new Web-Developer with a good understanding of the basics and eagerness to enrich my knowledge base.

Looking up for a team that will welcome and give me opportunities to grow as a developer. In return, I promise to give back 110% of my best.

Hope to hear back from you,
Vitalie

🧠 SKILLS

JavaScript   **HTML/CSS3**

Python   **Git**   **Sass**

NodeJs (1 project)   **React** (1 project)

MySQL (1 project)

Fluent

Russian
Fluent

Romanian
Native

🗂 PROJECTS

My first CRUD Application

https://stoic-mcnulty-a0ecf7.netlify.app/

A small CRUD application (without U for now) to add/delete products.

The Front End is fully written in React and is hosted on Netlify
The Back End is Node.js and is running on Heroku
For the database, I've got MySql hosted on https://www.freemysqlhosting.net/

Tic-Tac-Toe

https://justlenard.github.io/Tic-Tac-Toe/

A single-player Tic-Tac-Toe game with the ability to choose between 3 difficulties and playing as 'o' or 'x'.

The highlight of the project is the **minimax algorithm** which makes the ai unbeatable at the highest difficulty.

Etcth-a-Sketch

https://justlenard.github.io/Etch-A-Sketch/

A drawing board that gives you at disposition the following tools:
'Color picker'
'Pen'
'Rainbow Pen'
'Shader'
'Fill'
Besides that, you can readjust the size of the board to your preferences.

Calculator

https://justlenard.github.io/Calculator/
This is not a simple calculator.
No, my version of it can do complex logic. It fully supports parenthesis and power. Inputs like this:
2 * (8 ^ (3 - 2 * 0.5 + 9 ^ 2 / 3) + 5) ^ 0.5 - 5
are fully supported.
